

Caryn Humphreys

UX Leader | Scaling Systems and Driving Consistency

519-635-1526

caryn@carynfavour.design

London, Ontario, Canada

Senior UX leader with 10+ years of experience scaling design systems, improving product consistency, and leading cross-functional teams. Proven success driving adoption of enterprise design systems, reducing design and development timelines, and unifying product experiences. Skilled in balancing hands-on design with organizational leadership to deliver user-centered, scalable, and consistent product outcomes.

W O R K E X P E R I E N C E

Senior UX Manager, Arctic Wolf

2021 – Present

- Scaled Fenrir, Arctic Wolf's design system, into the default product foundation, adopted by 95% of product teams, enabling faster delivery, consistent design patterns, and reduced defects across the product suite.
- Reduced average design delivery timelines by 63–75% (from months to 1–3 weeks) through structured processes, reusable patterns, and closer design–engineering collaboration.
- Introduced and governed company-wide information architecture, establishing scalable navigation patterns that support new features, acquisitions, and long-term product integration.
- Drove cross-functional alignment between UX, Product, and Engineering by embedding designers in product streams, strengthening trust, and ensuring consistent UX involvement across initiatives.
- Advanced UX team maturity by coaching senior designers, grooming future leaders, and piloting hybrid designer-researcher roles to balance strategic and tactical work.
- Championed governance and contribution models that improved designer accountability, encouraged shared ownership of design patterns, and reduced duplication.
- Delivered measurable quality improvements by unifying tokens across Figma and React libraries, cutting inconsistencies between design and development, and lowering Fenrir's active bug count.

Product Manager (North America), Flyt (Just Eat Takeaway.com)

2019 – 2021

- Led product management for North America, working directly with restaurants and partners to define requirements and align on business goals.
- Shipped the Connect API, enabling partners to quickly integrate ordering and delivery systems, improving onboarding speed and reducing technical barriers.
- Drove cross-functional collaboration across design, development, and operations, ensuring consistent execution and measurable adoption.

UX & Product Designer, Vehikl

2014 – 2019

- Designed and delivered end-to-end SaaS and enterprise product experiences, improving usability and adoption across diverse client projects.
- Introduced reusable design patterns and early design system practices that increased speed, reduced inconsistencies, and improved collaboration with developers.
- Partnered with cross-functional teams to define product requirements, streamline workflows, and ensure user-centered delivery.
- Published articles and provided thought leadership that strengthened Vehikl's reputation in the design and tech community.

Earlier Experience | Various Roles

2008 – 2014

Gained early experience in project coordination, client engagement, and design execution, building the foundation for UX leadership and product strategy

EDUCATION & CERTIFICATIONS

Diploma with Distinction, Advertising | Conestoga College

(foundation in design and communication)

2007–2009

Human-Computer Interaction | Coursera

(applied UX research & design)
